**Mother of Child With Autism  
Creates Interactive CD-ROM  
*Teaches Parents and Professionals How To  
Elicit Communication in Children with Autism***

Autism, a topic that has been getting a lot of press attention recently, is a word that Sharon Sexton-Braun is all too familiar with. When her son was first diagnosed with an Autism Spectrum Disorder at the age of three, she was devastated. After years of research and education herself on the subject, she has created “Operation Communication,” the first in a series of CD-ROMs designed to educate parents and professionals on how to teach children on the Spectrum in the natural environment.

Visit [www.autismedu.com](http://www.autismedu.com) to learn more about Sharon Sexton-Braun and her new interactive CD-ROM entitled: “Operation Communication – Strategies that Facilitate Communication in the Natural Environment for Children with Autism Spectrum Disorders.”
